

**GUARDIAN®
INGLASS®**

Advanced Interior Glass

Pure. Bright. Boundless.

Guardian UltraClear™

Low-Iron Glass

THE NEW
NEUTRAL

Manufactured using a proprietary process, quality materials and dramatically low iron content, Guardian UltraClear™ glass is noticeably more clear and color neutral than standard float glass.

WHAT WILL YOU CREATE?

Guardian UltraClear™ glass substrate elevates the performance and aesthetics of a wide range of interior glass products—expanding the possibilities for your next project.

Laminated UltraClear glass preserves light transmission through laminated layers that add strength, security and sound control

SatinDeco® UltraClear glass provides translucence for privacy with light, in a neutral color

Mirror UltraClear glass improves the clarity and distortion-free qualities of mirrored glass

ShowerGuard® UltraClear glass resists corrosion while transmitting light and color-true views of bathroom design elements

Frameless enclosures, storefronts, surfaces and shelving call for strikingly clear edges. Guardian UltraClear™ glass delivers. The green cast of standard glass is amplified at the edge as size and thickness increases. UltraClear glass significantly reduces this effect for a clear, neutral finish no matter the dimensions of your application.

UltraClear glass

Standard Clear glass

SIZES AND THICKNESSES

UltraClear glass is available in thicknesses from 2mm to 12mm. Maximum size is 130" x 204".

PROCESSING OPTIONS

UltraClear glass can be processed like any conventional float glass, including lamination, painting, cutting, bending, silk screening and tempering.

YOUR VISION. NOTHING ELSE.

Guardian UltraClear™ low-iron float glass delivers maximum clarity and color neutrality—clear to the edge. Without the green tint of standard float glass, it elevates light transmission and presents views that are true to life.

Designers and architects choose UltraClear glass to flood interiors with natural light and create drama with spaces that feel bright, open and boundless. Applications are many, including frameless enclosures, walls and partitions, entranceways, display cases, tables, railings and more—anywhere neutral color and clarity count.

UltraClear glass is a featured product from Guardian InGlass™, a complete offering of interior glass solutions.

Berman Glass editions *designer glass textures*

DiamondGuard® *high endurance glass*

EXTERIOR ADVANTAGE

Guardian SunGuard energy saving architectural glass can also be enhanced with UltraClear float glass.

New possibilities include low-E glass that invites more natural light and looks more neutral, and SunGuard Spandrel HT that shows true paint color through the glass.

See what's possible™

Guardian Glass is a leading international manufacturer of float, value-added coated, and fabricated glass products and solutions for architectural, residential, interior, transportation and technical glass applications. To learn more, visit GuardianGlass.com.
